

SO YOU WANT TO BUILD AN EFFIGY OR TEMPLE...

Sourcing wood - alternatives to purchasing new lumber:

1. Consider using natural wood instead of lumber
2. Ask your friends, neighbors, or community if they have extra wood
3. Craigslist or Facebook Marketplace:

Pick up free or cheap wood or wooden furniture

4. Architectural Salvage

For example: <https://www.sarasotasalvage.com/>

5. Commercial Woodworking Firms

Milling companies, furniture manufacturers, cabinet makers, and all your local wood flooring installation companies have wood cutoffs and discards. Ask to speak with the owner or manager.

6. Lumber Mills and Lumber Yards

Like commercial woodworking firms, they produce a lot of waste. Again, be professional and courteous. Talk to the yard manager and ask him if he has any waste you could take off his hands.

7. Furniture at Yard Sales, Junk Stores and Flea Markets

8. Pallets - you can order them online, or talk to small businesses about picking them up. Large businesses usually have a pallet pickup service and will not be able to hand them over.
